

## DO YOU WANT TO LEARN A TRADE?

IUPAT DC38 is now recruiting pre-apprentices and apprentice glaziers for large projects beginning August and September in the Victoria area. This is more than a work opportunity, it's a chance to try out the Glazing Trade in a Union environment, and could lead to a sponsorship as a Glazier Apprentice and the start of a rewarding career in the Glazing Industry. We are committed to helping the Industry grow, and are proud to offer the best wage packages and training to our members.

A Glazier measures, handles, cuts, prepares, and installs all types of glass, mirrors and glass substitutes typically in buildings or on the exterior walls of buildings as well as layout, fabrication removal, repair, replacement and sealing of all architectural metal products.

Glazing is well suited for people who are physically fit (some heavy lifting required), good with their hands, enjoy a fast-paced environment, comfortable working at heights and able to work independently and as part of a team.

As with all Trades, a successful career in the Glazing Trade will require a strong work ethic, flexibility and self-starter attitude.

To learn more please visit <http://ftibc.ca/apprenticeships/glazing>

Preference will be given to candidates with Grade 12 education and current driver's license, but we will consider Grade 10 or equivalent, including Math 10, English 10, and Science 10.

Please forward your resume and cover letter to [mallen@dc38.ca](mailto:mallen@dc38.ca). Your resume should outline your employment and education history, and your cover letter should outline why you would be a good candidate for the Glazing industry.
